FIG. 8

A cross-sectional view of a mechanical assembly 110. The assembly includes a base 12 with a central bore 128. A shaft 130 is mounted in the bore, featuring a central section 132 with a different cross-section. A sleeve 162 is positioned around the shaft, with a flange 170 at the top. A pin 176 is used to secure the sleeve to the shaft. A seal or gasket 178 is located between the sleeve and the base. A component 186 is shown in a cross-section, and a component 188 is shown in a longitudinal section. The assembly is labeled 110 with an arrow pointing to the entire unit.
